

DESCALE (POWER)

Gold Coast's POWER DESCALING is a very highly active material that quickly dissolves mineral scale and oxidation build up.

POWER DESCALING contains an inhibitor which makes it non-corrosive to metals.

For use in towers, condensers, supply lines, and heat exchangers. Use full strength. Add directly to cooling tower condenser water.

CAUTION: contains hydrochloric acid.

Always wear gloves and safety glasses as this is a very strong product but is safe when used properly.
