Sorbency for Where You Walk to Keep Your Floors Dry

Grips Floor for Safety

Top and bottom layers of FineFiber are built of densely woven, small-diameter strands of fiber to increase surface area — enabling the Mat to grip the floor and secure it for safer walking. Universal application for oil, coolants, solvents and water.

Virtually Indestructible

FineFiber Mat has a layer of MeltBlown polypropylene ultrasonically sandwiched between two FineFiber layers. 3-ply construction resists heavy foot traffic.

High Sorbency Means It Stays on the Job Longer

Large-diameter MeltBlown polypropylene fibers create a high-loft inner layer that absorbs up to 33.7 ounces per 15" x 19" HeavyWeight Pad and 49.8 gallons per 150' HeavyWeight Roll.

Multi-Perfs Save You Money

Rolls are perfed every 7.5" vertically and every 17" horizontally. Pads are perfed vertically at 7.5".

Tear off only what you need — save money!

(GRFF50H, GRF24150H & GPF20S are perfed at different intervals.)
