## PRODUCT DATA

### BIOLOGICAL ODOR DESTROYER

- ALL PURPOSE ODOR CONTROLLER
- BIO-ENZYMATIC ORGANIC STAIN AND ODOR REMOVER
- LEAVES A FRESH AND CLEAN FRAGRANCE BEHIND

B. O. D. is a newly developed Bio/Chemical formulation consisting of a synergistic blend of three selected bacillus micro-organisms.

In the development of B.O.D., of great importance, was the selection of a blend of bio-strains specifically designed to promote optimum enzymatic activity for the production of protease, lipase, amylase and cellulose enzymes. To further enhance the broad spectrum capabilities of "Biological Odor Destroyer", special biodegradable surfactants and fragrances were selected and combined with our bio-formulation creating a unique chemical/bacteria blend, with outstanding broad range functions.

B.O.D. is an unsurpassed, safe, natural solution for many types of organic waste, odor and stain problems.

#### TYPICAL CHARACTERISTICS BENEFITS

Physical                      \* \* Instant Odor Control  
Appearance: A pinkish-red liquid                      \* \* Organic removal & quick cleaning action.  
Odor: Fresh and Clean                      \* \* Non Acid, Non Toxic.  
PH: 8.2 to 8.8  
Effective PH Range: 5.9 to 9.0  
Effective Temp. Range: 45° to 105°F

Biological Bacterial Count  
Colony Forming Units (CFU)                      220 billion per gallon

- \* \* Protein digesting bacteria
- \* \* Starch digesting bacteria
- \* \* Cellulose digesting bacteria
