

PRODUCT DATA

CON KILL II

Product Description

A contact, non-selective vegetation killer. An effective chemical trimmer. When used as directed, it will kill most all forms of plant growth without damage to the soil. The active ingredient is rapidly absorbed and visible effects seen in a few days. This product is inactivated upon contact with soil.

Application

Use for aquatic use where there is no outflow of water. Use on submersed weeds, floating weeds, duckweeds, marginal weeds and algae. Use also for non-aquatic applications. Use in general weed control in non-crop areas, shrub areas, spot weed control in lawns, and general vegetation control around buildings and other installations.
