# OIL ABSORBENT HAZMAT PADS

## SORBENCY FOR WHERE YOU WALK TO KEEP YOUR FLOORS DRY

### Features:

- Top and bottom layers are built of densely woven, small-diameter strands or fiber to increase surface area - enabling the pad to grip the floor and secure it for safer walking. Universal application for oil, coolants, solvents and water.
- Oil Absorbent hazmat Pads have a layer of polypropylene ultrasonically sandwiched between two fine fiber layers. 3-ply construction resists heavy foot traffic.
- Large diameter polypropylene fibers create a high-loft inner layer that absorbs up to 33.7 ounces per 15" x 19" heavy weight pad and 49.8 gallons per 150' heavy weight roll.
- Rolls are perforated every 7.5" vertically and every 17" horizontally. Pads are perforated vertically at 7.5". Tear off only what you need - save money!
